

## Skill-Pill launches Skill-Pill Express

**London: June 07, 2010:** Skill-Pill M-learning launches a new service, Skill-Pill Express.

Skill-Pill Express is a training solution designed for cost conscious organisations. The service transforms existing training presentation slides into a 2-minute Skill-Pill, featuring a professional voiceover. They can then be sent out to mobile devices, BlackBerrys and desktops.

The value offered by Skill-Pill Express, combined with the 72 hour turnaround time, allows clients to increase their mobile learning content very quickly. It is an ideal service for organisations who urgently require training on a range of subjects.

Skill-Pill Express is the latest in a range of services offered by Skill-Pill, which can all be accessed on 'apps' for all the major platforms.

Gerry Griffin, Skill-Pill director sees the new service as a great addition to Skill-Pill's existing offerings. "Skill-Pill Express gets users learning on the move, at an affordable price".
